Brief Description of Instructional Program

Crestwood High School (CHS) helps all students develop the world class skills, life and career characteristics and world class knowledge included in the Profile of the SC Graduate by providing a safe, caring, and academically challenging learning environment. This goal is achieved by providing professional development that helps teachers implement research-based best practices that assist students in becoming college and career ready.

To ensure that our students receive world-class knowledge, a comprehensive and rigorous educational program helps to produce globally competitive graduates who are prepared to become innovative 21st-century leaders. CHS is committed to the development of life-long learners who utilize critical thinking, problem-solving, and decision-making skills that are needed to work with diverse populations. Additionally, CHS offers multiple modern language courses that expand student awareness of other cultures.

Other educational experiences that broaden world class knowledge are provided in science, technology, mathematics, fine arts, social sciences, and extracurricular activities. Annual on-campus career and college fairs help ensure that students make a successful transition from high school to postsecondary education and the world of work. Many students gain skills by enrolling in sequenced and integrated programs of study through Sumter Career and Technology Center where they acquire competencies for the worldwide workplace. Our students have the opportunity to participate in internships with local businesses, and these experiences foster an understanding of the importance of collaboration, communication, and teamwork in the workplace.

Life and career characteristics are taught to all CHS students. Students are reminded of the school's mission statement, "Keeping Academics and Citizenship First and Foremost," and character education traits are reinforced through daily announcements.

Dr. Shirley Gamble, Principal
