## **Brief Summary of Instructional Program**\_\_\_\_\_

Mayewood Middle School helps all students develop the world-class skills along with life and career characteristics of the Profile of the South Carolina Graduate by providing a safe, supportive, and academically challenging learning environment. Our school's mission is to deliver a comprehensive, standards-based education utilizing best practices in order to prepare students to be responsible, successful, and productive citizens in a global society. We are accomplishing our mission by creating a school environment that is focused on learning, providing our teachers with professional development, and monitoring and celebrating the academic growth of our students.

Mayewood Middle has implemented Multi-Tiered System of Supports, or MTSS, to help build a comprehensive and unified support system through the understanding and integration of learning supports for all of our students. As a school, we are committed to

providing our students with effective instruction. To accomplish this task, our teachers are provided with embedded professional development that focuses on students' and teachers' support needs identified by observations and student data. Teachers work collaboratively to share effective strategies, model lessons, and improve instructional practices based on best practice research.

With the implementation of the One-to-Global Chromebook initiative, both teachers and students embrace and develop new teaching and learning strategies that incorporate the latest technology tools. Together with the efforts of students, teachers, parents and staff, Mayewood is accomplishing its mission. We believe that our students will be future South Carolina graduates and world leaders!
