Brief Summary of Instructional Program—————

Rafting Creek Elementary School helps all students develop the world class skills and life and career characteristics of the Profile of the South Carolina Graduate by providing them with a quality education in an environment where they feel safe and enjoy learning. We are constantly evolving in order to meet the needs of our students and welcome any changes that will support student success.

Rafting Creek's highly qualified staff delivers engaging, rigorous curriculum utilizing best practices in ELA, math, science and social studies based on SC College and Career Readiness Standards. Our students are provided with daily equitable learning experiences that help them to think critically, master learning, and develop problem-solving, as well as, life skills that will enhance their college and career readiness.

Title One funds are used to enhance our resources by funding educational, enrichment opportunities for both students and staff such as the after-school tutoring program,

professional conferences, and workshops. In addition, Rafting Creek has implemented a plan to increase technology resources. Students will have more hand-held devices to explore, solve problems, collaborate and produce products demonstrating their understanding and readiness for a 21st century global society.

Our Character Education program integrates good character traits throughout the school, as well as into the community. It is designed to motivate and empower our students to have integrity, strong work ethics, good interpersonal skills, and to be self-motivated. Our music and art enrichment classes focus on nurturing our students' creativity and innovation.

Parental and community involvement are a vital part of our school in preparing future graduates and world leaders. We continue to partner with all stakeholders to strengthen our services and to achieve the mission of Rafting Creek Elementary School which is to provide a quality education for all students.
